

UČNI NAČRT PREDMETA / COURSE SYLLABUS						
Ime predmeta:	Klinična biokemija					
Course title:	Clinical Biochemistry					
Študijski program in stopnja Study programme and cycle		Študijska smer Study option		Letnik Year of study	Semester Semester	
Splošna medicina, enovit magistrski študijski program						
General medicine, Uniform master's degree study program						
Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)		obvezni compulsory				
Univerzitetna koda predmeta / University course code: _____						
Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
15	15	AV LV RV	30		30	3
Nosilec predmeta / Course coordinator:		doc. dr. Pika Meško Brguljan				
Jeziki / Languages:		slovenski/slovene				
		slovenski/slovene				
Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:		Prerequisites for enrolling in the course or for performing study obligations:				
Vsebina (kratek pregled učnega načrta):						
<p>PREDAVANJA in SEMINARJI: Uvod v klinično biokemijo, organizacija klinične biokemije in laboratorijskih metod, zagotavljanje kakovosti, evaluacija metod v klinični biokemiji in referenčne vrednosti, testiranje ob pacientu (POCT), biološki vzorci – vrste analiznega materiala, seči in urinske preiskave, beljakovine v krvni plazmi, neproteinske dušikove spojine v krvnem serumu, lipidi in lipoproteini, motnje v presnovi ogljikovih hidratov, sladkorna bolezen: diagnostika in kontrola terapije, acidobazno ravnotežje in plinska analiza krvi, voda in elektroliti, laboratorijska endokrinologija, klinična encimologija, tumorski označevalci.</p> <p>VAJE: Hematološke preiskave, urinske preiskave, določanje acidobaznega ravnotesja in elektrolitov, analitika beljakovin v serumu, določanje neproteinskih dušikovih spojin, bilirubina in drugih pomembnih metabolitov v serumu, imunološke preiskave, določanje</p>						
Content (syllabus outline):						
<p>LECTURES and SEMINARS: Introduction into Clinical Biochemistry, organisation of clinical biochemistry and laboratories, quality assurance, evaluation of methods in clinical biochemistry and reference values, point of care testing (POCT), biological material – variety of analytical samples, urine and urinalysis, plasma proteins, nonprotein nitrogenous compounds in serum, lipids and lipoproteins, disturbances in carbohydrate metabolism, Diabetes mellitus: diagnostics and laboratory monitoring of treatment, acid – base balance and blood gas analysis, water and electrolytes, laboratory endocrinology, clinical enzymology, tumour markers.</p> <p>Laboratory work: Laboratory Hematology, urine examination, acid – base balance and electrolytes analysis, analytical techniques for protein determination, nonprotein nitrogenous compounds, bilirubin and other important metabolites in serum, immunodiagnostic</p>						

koncentracij zdravilnih učinkovin v biološkem materialu, ogled klinično-biotekničnih laboratorijs.

procedures, therapeutic drug monitoring, visit to clinical biochemical laboratories.

Cilji in kompetence:

Predmet študenta teoretično in praktično seznanji s področjem klinične biokemije. Na predavanjih in seminarjih posluša in aktivno pripravlja in predstavlja različne teme o pomembnosti klinično-biotekničnih preiskav v sodobni diagnostiki, seznanji se tudi z analitiko teh preiskav.

Na vajah vrši sam, ali v skupini, nekatere analizne postopke pregleda bioloških vzorcev.

Objectives and competences:

The subject introduces the student theoretically and practically to the area of Clinical Biochemistry. The student listens to lectures and coursework and actively prepares and presents various themes on the importance of clinical-biochemical examinations in modern diagnostics as well as analytical procedures.

In laboratory practice the student performs some analytical procedures for examinations of biological samples, either alone or in group.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študent mora zahtevano znanje in razumevanje predmeta potrditi s kolokvijem iz vaj, opravljenim seminarjem in izpitom.

Prenesljive/ključne spremnosti in drugi atributi:
Pridobljeno znanje študent koristi in prenese za razumevanje diagnostike bolezni v interni medicini, pediatriji, ginekologiji in onkologiji.

Intended learning outcomes:

Knowledge and understanding:

Student must confirm the learned knowledge and understanding with examination of laboratory practice, completed seminar and final examination.

Transferable/Key Skills and other attributes:

Acquired knowledge is useful for student and helpful to understand diagnostics of diseases in internal medicine, pediatrics, gynecology and oncology.

Metode poučevanja in učenja:

Predavanja in seminarji
Laboratorijske vaje

Learning and teaching methods:

Lectures and seminars
Laboratory practice

Delež (v %) /

Share (in %)

Assessment methods:

Načini ocenjevanja: ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV Predavanja in seminarji so del pedagoških obveznosti študenta. Pri predavanjih je potrebna 50 % prisotnost, pri seminarjih 80 % prisotnost in pri vajah 100 % prisotnost. Prisotnost se sprotno preverja. Študent mora zahtevano znanje in razumevanje predmeta potrditi s kolokvijem iz vaj, uspešno opravljenim seminarjem in izpitom. Študent mora za vsako opravljeno vajo oddati poročilo na predpisanim obrazcu. Po opravljenem sklopu vseh predvidenih vaj in oddanih poročil sledi preverjanje znanja - kolokvij, ki zajema tematiko celotnih vaj. POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA Uspešno opravljen kolokvij iz vaj in uspešno opravljen seminar sta pogoja za pristop k opravljanju izpita iz Klinične biokemije. Zahtevana prisotnost je tudi dodaten pogoj za pristop k izpitu. OBLIKE IN NAČIN PREVERJANJA IN OCENJEVANJA ZNANJA Preverjanje znanja na izpitu se izvrši pisno, če v izpitnem roku pristopijo k izpitu več kot 4 študenti ali ustno v primeru manj kot 5 študentov. KRITERIJI ZA OCENJEVANJE IN DELEŽI Končna ocena predmeta je odraz znanja: a) ocena izpita 70 % b) ocena zaključnega kolokvija 30 %	Delež (v %) / Share (in %) 70 30	ACADEMIC OBLIGATIONS OF STUDENTS Lectures and coursework are a part of pedagogical obligations of a student. At lectures 50% attendance is required, at coursework 80% attendance is required and at laboratory practice 100% attendance is required. Attendance is checked regularly. The student must confirm the required knowledge and understanding of the subject by a partial exam in laboratory practice, successfully completed coursework and exam. The student must, for every completed laboratory practice, hand in a report on the prescribed form. After the completed set of all foreseen laboratory practice and reports that were handed in what follows is knowledge checking – a partial exam which encompasses the entire laboratory practice theme. REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING Successfully completed partial exam in laboratory practice and successfully completed coursework are requirements for access to exam taking in Clinical biochemistry. The required attendance is also an additional requirement for taking the exam. FORMS AND MODE OF CHECKING AND ASSESSING KNOWLEDGE Knowledge checking during the exam is executed in a written form in case, on an examination date, more than four students are to take the exam or in an oral form in case less than five students are to take the exam. CRITERIA FOR ASSESSMENT AND SHARES The final mark of the subject is a reflection of knowledge: a) exam mark 70% b) final partial exam mark 30%
		DRUGE INFORMACIJE Dodatne informacije pri izpolnjevanju študijskih obveznosti so dosegljive pri asistentih in pri predstojniku katedre oz. nosilcu predmeta. OTHER PIECES OF INFORMATION Additional pieces of information regarding the fulfilment of academic obligations are available with assistants and heads of the departments or subject holders.
