Jeziki /Languages:	Predavanja / Lectures: slovenski/slovene
	Vaje / Tutorial: slovenski/slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:

Vsebina (kratek pregled učnega načrta): Predmet Vplivi okolja in zdravje je interdisciplinarni predmet, sestavljen iz treh področij: a) Okoljska medicina V okviru predmeta OKOLJSKA MEDICINA bodo študenti spoznali zgodovinski razvoj ter pomen in vpliv družbenega okolja za razvoj tega področja. Predstavljen bo pomen medsebojnega ravnovesja med okoljem, osebami in posameznimi dejavniki, ki vplivajo na zdravje. Seznanili se bodo z različnimi adaptacijskimi mehanizmi. V okviru predmeta bodo prikazni	Content (syllabus outline): <u>Subject " Environment and Health is interdisciplinary, and covers three fields:</u> a) Environmental medicine Within the ENVIRONMENTAL MEDICINE course a student will introduce historical development of the discipline. The interrelationship between environment, individuals and risk factors will be presented. Special emphasis will be given to different levels of adaptation. Main risk factors in living and working environment will be presented as well.
---	---

<p>najpomembnejšimi dejavniki delovnega in bivalnega okolja.</p> <p>Spoznali bodo nekatere primere škodljivega delovanja dejavnikov delovnega in bivalnega okolja na zdravje. Seznanili se bodo s temeljnimi načini ukrepanja na področju zmanjševanja delovanja škodljivih dejavnikov v delovnem in bivalnem okolju. Spoznali bodo specifične pristope v okviru medicine dela za zgodnje odkrivanje nevarnosti, povezane z delom ter načine s katerimi država in delodajalci zmanjšujejo ogroženost zdravja zaposlenih.</p>	<p>Students will deal with different case studies where the health impairment was caused by exposure to hazardous factors in environment.</p> <p>Students will become aware of importance of introduction of effective measures for ensuring healthy life style and work environment.</p> <p>The students will get an overview of basic measures implemented by government in order to reduce harmful exposures to living and working environment.</p>
<p>b) Geriatrija</p> <p>Študent naj spozna proces staranja in epidemiološke podatke, ki so povezani s starostjo in boleznimi v starosti. Študent spozna najpomembnejše bolezni tega obdobja, poseben poudarek je na boleznih, ki so glavni vzrok smrti (srčno-žilne bolezni, rak, itd). Seznaniti se s posebnostmi zdravljenja starostnika. Spozna problem nezmožnosti (disability) starostnika in možnosti prevence bolezni pri starostniku.</p>	<p>b) Geriatrics</p> <p>Students should learn about the process of aging and epidemiological data and diseases related to old age. Student are introduced to the most important diseases of old age, with accent on the illnesses which are main cause of death (cardiovascular diseases, cancer, etc.), as well as to the particularities in treatment of the elderly. Students recognise problem of disability and possibilities of prevention in the elderly.</p>
<p>c) Klinična prehrana</p> <ul style="list-style-type: none"> -Ocena prehranskega stanja -uporaba in analiza dietnega dnevnika, klinična in biokemijska analiza stanja prehranjenosti, prehranski vnos glede na sestavo po posameznih skupinah hranil in energetski vnos, ocena ustreznosti vnosa . -Nutraceutiki in njihov pomen za zdravje - Pomen probiotikov , prebiotikov in antioksidantov v prehrani - Sodobne smernice prehrane dojenčkov, prešolskih in šolskih otrok ter odraslih - Enteralna in parenteralna prehrana - Prehranska modulacija in imunske funkcije -Prehrana akutno bolnih (napr. akutni gastroenteritis) -Prehrana kritično bolnih(napr. KVČB, ledvične bolezni..) -Motnje hranjenja in prehranska podpora teh bolnikov -Načrtovanje prehrane akutno in kronično bolnih bolnikov in planiranje klinične dietoterapije 	<p>c) Clinical nutrition</p> <ul style="list-style-type: none"> - Assesment of nutritional status – use and analysis of diet journal(interview),clinical and biochemical analysis of nutritional status, nutritional intake regarding composition by individual nutrient groups and energy intake,intake adequacy assessemest - Nutrition in childhood and the most common gastrointestinal disorders in conetction with the food -Nutraceuticals and their importance for health - The importance of probiotics, prebiotics and antioxidants in nutition -Contemporary guidelines for nutrition of infants,preschool and school children as well as the adults -Enteral and parenteral nutrition -Nutritional modulation and immune functions -Nutrition of acute illpatients (i.e. Ac.gastroenteritis) -Nutrition of critically ill patients (IBD, renal diseases) -Eating disordersand nutritional suport of these patients -Planning nutrition of acute and chronic ill patients and planning of diet therapy

Cilji in kompetence:**a) Okoljska medicina**

Študentke in študenti bodo spoznali vplive širšega in ožjega bivalnega okolja ter delovnega okolja na človekovo zdravje, bodisi v dobrem-pozitivnem, bodisi v slabem-negativnem smislu. Cilj predmeta je približati razumevanje pomena zagotavljanja osnovnih predpogojev za zdravo življensko in delovno okolje. Namen predmeta je tudi študentom pomagati razumeti specifične metode dela pri odkrivanju in obvladovanju škodljivosti v delovnem in bivalnem okolju.

Objectives and competences:**a) Environmental medicine**

Students should know the importance and influence of living and work environment to the health of an individual. The specific objective is to help students to understand the importance of ensuring all basic requirements for healthy living and work environment. Further on the subject aims to improve the theoretical knowledge on specific methods and approaches usually applied in order to identify and manage risk factors in living and work environment.

b) Geriatrija

Študent naj spozna možnosti ohranjanja starostnikovega zdravja. Spozna naj specifičnost bolezenskih procesov oz. bolezni pri starostniku (efekt domin).

b)Geriatrics

Student recognises abilities how to sustain life of an elderly person and specificity of disease processes. Illnesses in elderly (domino effect)

c) Klinična prehrana**c) Clinical nutrition**

<p>Cilji : poznavanje prehrane za vzdrževanje zdravja in za različna bolezenska stanja in motnje hranjenja</p> <p>Splošne kompetence:</p> <p>Razumevanje konceptov znanstvenih izhodišč klinične prehrane in dietetike, ki študenta usmerjajo k analiziranju in reševanju problemov.</p> <p>Razvijanje zmožnosti za iskanje, izbiro in uporabo relevantnih podatkov in najnovejših informacij iz področja prehrane</p> <p>Predmetno specifične kompetence:</p> <p>Študent zna oceniti stanje prehranjenosti bolnika.</p> <p>Študent zna prepoznati osnovne simptome, pozna diagnostične postopke in principe zdravljenja bolezni ter najprimernejšo obliko prehrane pri določeni bolezni vključno z vsemi oblikami umetne prehrane</p> <p>Razvija sposobnosti sodelovanja v multidisciplinarnem timu</p> <p>Razvija sposobnosti raziskovanja,dokumentiranja, analize rezultatov , prikaza rezultatov in njihove objave v strokovni /znanstveni literaturi</p>	<p>Objectives: knowledge of nutrition to maintain health and disease states, and eating disorders</p> <p>General competences:</p> <p>Understanding the concepts of scientific platform clinical nutrition and dietetics, which guide the student to analyze and solve problems.</p> <p>Developing capabilities for search, selection and use of relevant data and the latest information from the field of nutrition</p> <p>Subject-specific competencies:</p> <p>The student is able to assess the nutritional status of the patient.</p> <p>The student is able to identify basic symptoms familiar with diagnostic procedures and principles of treatment of the disease and the best form of nutrition for certain diseases including all forms of artificial nutrition</p> <p>Develops the capacity to participate in multidisciplinary team</p> <p>Develop the ability to research, documentation, analysis of the results, display results and their publication in professional / scientific literature</p>
---	---

Predvideni študijski rezultati:

Znanje in razumevanje:

a) Okoljska medicina

Študentke in študenti bodo:

poznali pomen in vlogo okoljske medicine in medicine dela v zgodovini in sedanjosti,
 poznali pristope, probleme in rešitve pri pridobivanju podatkov za raziskave v okviru okoljske medicine in medicine dela,
 sposobni opraviti osnovno oceno tveganja ob upoštevanju različnih načinov izpostavljenosti škodljivim dejavnikom,
 poznali vrste in obseg problemov v okviru okoljske medicine in medicine dela v Sloveniji in v svetu,
 poznali osnovne pristope in ukrepe za obvladovanje problemov v okviru okoljske medicine in medicine dela.

Intended learning outcomes:

Knowledge and Understanding:

a) Environmental medicine

On the completion of this course student will:

understand the importance and role of environmental and occupational medicine in the past and present,
 introduce basic approaches, problems and solutions in collecting relevant data in environmental and occupational medicine,
 be able to conduct a risk assessment process considering different routs and intensity of exposure,
 be familiar with main problems in environmental and occupational medicine in Slovenia,
 will learn about basic approaches and measures in management of problems in environmental and occupational medicine.

b) Geriatrija

Študent spoznava »zdravo« starost – stanje, ki ni bolezen. Razumeti pa mora starost tudi kot stanje povečane dovzetnosti za bolezenske procese kot tudi, da bolezen pri starostniku poteka drugače (težje, sočasna prizadetost več organskih sistemov, itd.)

c) Klinična prehrana

Študent razume pomen prehrane v zdravju in bolezni
Pozna osnove učinkov hrane na bolezenske procese in razume patofiziološko dogajanje pri različnih motnjah

Prenesljive/ključne spremnosti in drugi atributi:

a) Okoljska medicina

Študentke in študenti bodo:

s pridobljenim znanjem in veščinami lahko sodelovali pri ugotavljanju razširjenosti zdravstvenih problemov in stanj, povezanih z negativnimi dejavniki v delovnem in bivalnem okolju ter pri proučevanju vzroke zanje, iskanju ukrepov za obvladovanje posledic ter pri ocenjevanju učinkovitosti teh ukrepov,
usposobljeni za interdisciplinarni pristop, načrtovanje in celovito obvladovanje procesov na področju zagotavljanja zdravega delovnega in bivalnega okolja,
usposobljeni za pridobivanje informacij na področju okoljske medicine in medicine dela s pomočjo spleta, literature in drugih virov podatkov in informacij ter za timsko delo.

b) Geriatrija

Zgodnja spoznava vulnerabilnosti starostnika in kompleksnost bolezenskih procesov

c) Klinična prehrana

Pozna različne načine prehranske podpore bolnikov in zna načrtovati prehrano

Ima teoretično podlago za sodelovanje pri raziskovalnem delu.

b) Geriatrics

Student learn about »healthy old age« - a state not being a disease. Students have to recognise an old age as state prone to illnesses, whose course is different (more severe, at the same time more systems are affected, etc.)

c) Clinical nutrition

Student understand the role of nutrition for health and for different pathological conditions

Student know the basic concepts of the effects of food to different diseases and understand the pathophysiological processes in different disorders

Transferable/Key Skills and other attributes:

a) Environmental medicine

The students will:

be able to recognize and understand approaches and problems in conducting assessment of public health problems arising due to exposure to negative risk factors in working and living environment,

be able to work in a multidisciplinary team in the planning process and conducting a comprehensive process for ensuring healthy work and living environment, capable for gathering data and information in the field of environmental and occupational medicine from the web and different other credible sources.

b) Geriatrics

An early detection of vulnerability of an old person and complexity of illness processes

c) Clinical nutrition

Student have to know the different types of nutritional support and know planning nutrition

Student have the theoretical foundation to collaborate in research work

Metode poučevanja in učenja:**a) Okoljska medicina**

Predavanja, seminarji, študij primerov, diskusije, nastopi, delo v manjših skupinah, reševanje konkretnih problemov, individualne naloge.

Learning and teaching methods:**a) Environmental medicine**

Lectures, seminars, case study, student's presentations, small group work, consultations, team work, individual work.

b) Geriatrija Predavanja služijo kot osnova, ki jo študent nadgradi z aktivnim sodelovanjem pri seminarjih.	b) Geriatrics <u>Lectures are the basis, which is upgraded with active participation in seminars.</u>
c) Klinična prehrana Predavanja Seminarske vaje –sodelovanje z gosti iz prakse	c) Clinical nutrition Lectures Seminar tutorial-including guests from practice

Načini ocenjevanja: Način (pisni izpit, ustno izpraševanje, naloge, projekt): a) Okoljska medicina Kolokvij	Delež (v %) / Share (in %)	Assessment methods: Type (examination, oral, coursework, project): a) Environmental medicine Partial exam
b) Geriatrija kolokvij	25	b) Geriatrics Partial exam
c) Klinična prehrana kolokvij ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV a) Okoljska medicina: 80% udeležba na predavanjih, seminarjih in vajah b) Geriatrija: 80% udeležba na seminarjih c) Klinična prehrana 80% udeležba na predavanjih, seminarjih in vajah POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA a) Okoljska medicina: 80% udeležba na predavanjih, seminarjih in vajah b) Geriatrija: 80% udeležba na seminarjih c) Klinična prehrana 80% udeležba na seminarjih	25	c) Clinical nutrition Partial exam ACADEMIC OBLIGATIONS OF STUDENTS: a) Environmental medicine 80% Participation at lectures and and seminars b) Geriatrics 80% Participation at seminars c) Clinical nutrition 80% Participation at seminars REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING: a) Environmental medicine 80% Participation at lectures and and seminars b) Geriatrics 80% Participation at seminars c) Clinical nutrition 80% Participation at seminars
