

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Ime predmeta:	Nastanek in vrste bolečine ter primerna obravnava bolnika z bolečino		
Course title:	Beginning and the types of pain and appropriate management of the patient with pain		

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
Splošna medicina, enovit magistrski študijski program		Četrtni, peti, šesti	7., 9., 11.
General medicine, Uniform master's degree study program		Fourth, fifth, sixth	7th, 9th, 11th

Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)	izbirni elective
--	---------------------

Univerzitetna koda predmeta / University course code:	
--	--

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
5	40	AV LV RV			45	3

Nosilec predmeta / Course coordinator:	Doc. dr. Nevenka Krčevski Škvarč
---	----------------------------------

Jeziki / Languages:	Predavanja / Lectures: slovenski/slovene
	Vaje / Tutorial: slovenski/slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:

Vsebina (kratki pregled učnega načrta):	Content (syllabus outline):
<ol style="list-style-type: none"> 1. Uvod: fiziologija in psihologija bolečine, anamneza in pregled 2. Akutna bolečina 3. Bolečina zaradi raka 4. Nevropatska bolečina 5. Razvoj kronične bolečine 6. Specifični bolečinski sindromi 	<ol style="list-style-type: none"> 1. Introduction: physiology and psychology of pain, history and examination 2. Acute pain 3. Cancer pain 4. Neuropathic pain 5. Development of pain chronicity 6. Specific pain syndromes

Cilji in kompetence:

Cilji:

Pridobiti osnovno znanje in veščine za diagnosticiranje in zdravljenje bolečine na izčrpen in jasen način.

Kompetence:

Študent bo sposoben opraviti pregled bolnika z bolečino in jo opredeliti po vzroku, patofiziologiji, lokalizaciji in trajanju. Študent bo lahko ocenil bolečino, razumel njen vpliv na kakovost življenja bolnika in bo sposoben oceniti kateri načini zdravljenja so primerni za določeno bolečino.

Objectives and competences:

Objectives:

The students will acquire basic knowledge and core skills for diagnosis and treatment of pain in a comprehensive and coherent fashion.

Competences:

student will be able to perform the examination of patient with pain and to identify pain causes, pathophysiology, localization and duration. Student will be able to measure pain and its implications for the patients' quality of life and will be able to assess the appropriate pain management for the certain pain.

Predvideni študijski rezultati:

Znanje in razumevanje:

- Primarno bodo študenti:
 - sposobni pri bolniku ugotoviti in oceniti bolečino
 - razumeti bolnikovo bolečino iz vseh videzov kakovosti življenja,
 - uporabiti metode analgezije za doseganje učinkovite kontrole bolečine, klasificirati metode izbirnega zdravljenja po stopnjevalni shemi
 - sposobni oceniti učinkovitost določene obravnave bolečine
 - prepoznati indikacije in uporabiti primerno psihoterapevtsko zdravljenje
 - Delno bodo študenti usposobljeni za prepoznavanje in osnovno specifično obravnavo:
 - akutne bolečine po poškodbi in operaciji

Intended learning outcomes:

Knowledge and understanding:

- Primarily, students should:
 - be able to identify patients with pain and measure pain
 - learn to understand a patient's pain and all its implications for the patient's quality of life
 - know and apply the methods of analgesia which offer effective pain control for the majority of patients, and to classify those methods in a graded scheme
 - be able to evaluate the effectiveness of a particular pain management
 - know and be able to apply the indications for appropriate psychotherapeutic treatment for pain
 - In particular, student should be able to differentiate between and to know the basic principles of specific treatment of main syndromes:

<p>-bolečine zaradi raka -nevropatske bolečine -kronične bolečine, ki ni posledica raka -funkcionalnih bolečih sindromov</p> <p>Prenesljive/ključne spremnosti in drugi atributi: Predmet omogoča, da študent spozna pomen celostne obravnave bolnika z bolečino</p>	<p>-acute post-traumatic and post-operative pain -cancer pain -neuropathic pain -chronic non-cancer pain -functional pain syndromes</p> <p>Transferable/Key Skills and other attributes: The course will enable student to recognize the importance of integral pain management</p>
--	--

Metode poučevanja in učenja:

- Predavanja
- Klinični primeri
- Seminarji

Learning and teaching methods:

- Lectures
- Clinical cases
- Seminars

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
Način (pisni izpit, ustno izpraševanje, naloge, projekt) <ul style="list-style-type: none"> • Seminar • Pisni izpit <p>ŠTUDIJSKE OBVEZNOSTI ŠTUDENTOV: Obvezna prisotnost na seminarjih in kliničnih vajah</p>	50 50	Type (examination, oral, coursework, project): <ul style="list-style-type: none"> • Seminar • Written exam <p>ACADEMIC OBLIGATIONS OF STUDENTS: Obligatory presence at seminars and clinical cases</p>
POGOJI ZA PRISTOP K POSAMEZNEMU PREVERJANJU ZNANJA: Seminarska naloga je pogoj za pisni izpit		REQUIREMENTS FOR ACCESS TO INDIVIDUAL KNOWLEDGE CHECKING: Coursework is prerequisite for written exam
