

**UČNI NACRT PREDMETA / SUBJECT SPECIFICATION**

<b>Predmet:</b>	Izbrane vsebine in novosti v anatomiji
<b>Subject Title:</b>	Selected topics and novelties in anatomy

Študijski program Study programme	Študijska smer Study field	Letnik Year	Semester Semester
Splošna medicina General medicine - EMŠP		1	2

Univerzitetna koda predmeta / University subject code:

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Labor work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
5	40				45	3

Nosilec predmeta / Lecturer:

Jeziki / Languages:   
 Predavanja / Lecture:  
 Vaje / Tutorial:

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Vsebino obravnavane teme izbere študent s pomočjo mentorja, iz klinične anatomije prsnega koša, trebuha, medenice in presredka, hrbta, zgornjega uda, spodnjega uda, glave, vratu, ali kranialnih živcev.

Content (Syllabus outline):

The student chooses a topic with the assistance of his mentor, from clinical anatomy of the thorax, the abdomen, the pelvis and perineum, the back, the upper limb, the lower limb, the head, the neck or the cranial nerves.

Temeljni literatura in viri / Textbooks:

- Moore KL, Dalley AF: Clinically oriented anatomy, Lippincott Williams and Wilkins, Philadelphia 1999

Cilji:

Študent razširjeno in poglobljeno obravnava izbrano temo iz celotnega obsega vsebin izbranega predmeta. Cilj je priprava študenta na samostojno obravnavo in predstavitev posameznih tem na osnovi tekočih dogajanj v

Objectives:

The student studies in detail a specific topic from the clinical anatomy. The aim is to prepare a student for individual treatment and presentation of certain topics

klinični praksi.	on the basis of current events in clinical practice.	
<p><b>Predvideni študijski rezultati:</b> Znanje in razumevanje:</p> <p>Pri izbranem predmetu študent utrjuje in pogloblja znanja in veščine, potrebne za samostojno delo in razčlenjevanje posameznih problemov na osnovi podatkov, dobljenih iz sodobne strokovne literature. Hkrati s tem utrjuje in pogloblja znanja in veščine, potrebne za samostojno iskanje sodobnih virov podatkov iz izbranega področja, njihovo analizo in predstavitev.</p>	<p><b>Intended learning outcomes:</b> Knowledge and Understanding:</p> <p>The student improves his knowledge and skills that are necessary for individual work and for analysis of certain problems based on data from the contemporary medical literature. The student also improves the knowledge and skills for individual searching for sources of data from the elected area, their analysis and presentation.</p>	
<p><b>Prenesljive/ključne spretnosti in drugi atributi:</b></p> <p>Prepoznavanje manj ali več pogostih anatomskih variacij in ugotavljanje pomembnosti le-teh za klinično prakso, sposobnost za diferencialno diagnostiko določenih patoloških dogajanj na osnovi že obstoječega znanja</p>	<p><b>Transferable/Key Skills and other attributes:</b></p> <p>The recognition of more or less frequent anatomical variations and recognition of their significance for clinical practice, the ability of differential diagnostics of certain pathological processes on the basis of already obtained knowledge.</p>
