Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Vsebina:

Študenti pod vodstvom mentorja, na osnovi svojega znanja anatomije obravnavajo klinične primere s stališča klinične anatomije prsnega koša, trebuha, medenice in presredka, hrbta, zgornjega uda, spodnjega uda, glave in vratu .

Content (Syllabus outline):

Under mentor's guidance, based on their knowledge of anatomy, the students discuss clinical cases from the aspect of clinical anatomy of the thorax, the abdomen, the pelvis and perineum, the back, the upper limb, he lower limb, the head and neck .

Temeljni literatura in viri / Textbooks:

Keith L. Moore, Arthur F. Dalley II, and Anne M. R. Agur, MD: Clinically Oriented Anatomy, 7th Edition, Baltimore, Lippincott Williams &amp; Wilkins, 2014

Cilji:

Študent razširjeno in poglobljeno proučuje izbrane teme iz celotnega obsega vsebin izbranega predmeta, na osnovi svojega že pridobljenega znanja.  
Cilj je priprava študenta na samostojno obravnavo in predstavitev posameznih tem na osnovi tekočih dogajanj v klinični praksi.

Objectives:

The student studies in detail chosen specific topics concerning clinical anatomy, based on his already achieved knowledge in anatomy.  
The aim is to prepare a student for individual treatment and presentation of certain topics on the basis of current events in clinical practice.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študent utrjuje in pogloblja znanja in veščine, potrebne za samostojno delo in razčlenjevanje posameznih problemov na osnovi podatkov, dobljenih iz sodobne strokovne literature. Hkrati s tem utrjuje in pogloblja znanja in veščine, potrebne za samostojno iskanje sodobnih virov podatkov iz izbranega področja, njihovo

Intended learning outcomes:

Knowledge and Understanding:

The student improves his knowledge and skills that are necessary for individual work and for analysis of certain problems based on data from the contemporary medical literature. The student also improves the knowledge and skills for individual searching for sources of data from the elected area, their analysis and presentation.

analizo in predstavitev.		
Prenesljive/ključne spretnosti in drugi atributi:  Prepoznavanje manj ali več pogostih anatomskih variacij in ugotavljanje pomembnosti le-teh za klinično prakso, sposobnost za diferencialno diagnostiko določenih patoloških dogajanj na osnovi že obstoječega znanja.		Transferable/Key Skills and other attributes:  The recognition of more or less frequent anatomical variations and recognition of their significance for clinical practice, the ability of differential diagnostics of certain pathological processes on the basis of already obtained knowledge.
